CONTENTS

Number 1

D. B. JOHNSON, J. C. WILLIAMSON & A. J. BAILEY. Microbiology of soils at opencast coal sites. I. Short- and long-term transformations in stockpiled soils 1

J. C. WILLIAMSON & D. B. JOHNSON. Microbiology of soils at opencast coal sites. II. Population transformations occurring following land restoration and the influence of ryegrass/fertilizer amendments 9

D. VAUGHAN & B. G. ORD. Influence of natural and synthetic humic substances on the activity of urease 17

B. A. GOODMAN, M. V. CHESHIRE & J. CHADWICK. Characterization of the Fe(III)–fulvic acid reaction by Mössbauer spectroscopy 25

R. H. NEWMAN & K. R. TATE. ^{13}C NMR characterization of humic acids from soils of a development sequence 39

K-U. GOSS & K-W. SCHRAMM. Determination of effective diffusion coefficients for gaseous and dissolved organic substances in soil material using a ' stopped elution ' method with HPLC and GC 47

N. J. JARVIS, P-E. JANSSON, J. P. DIK & I. MESSING. Modelling water and solute transport in macroporous soil. I. Model description and sensitivity analysis 59

N. J. JARVIS, L. BERGSTRÖM & P. E. DIK. Modelling water and solute transport in macroporous soil. II. Chloride breakthrough under non-steady flow 71

J. GROSSMANN & P. UDLUFT. The extraction of soil water by the suction-cup method: a review 83

N. S. JAYAWARDANE & P. S. BLACKWELL. Relationship between equivalent salt solution series of different soils 95

G. J. D. KIRK & P. H. NYE. A model of ammonia volatilization from applied urea. V. The effects of steady-state drainage and evaporation 103

G. J. D. KIRK & P. H. NYE. A model of ammonia volatilization from applied urea. VI. The effects of transient-state water evaporation 115

T. MIYAZAKI, T. KASUBUCHI & S. HASEGAWA. A statistical approach for predicting accuracies of soil properties measured by single, double and dual gamma beams 127

A. J. KOPPI & A. B. MCBRATNEY. A basis for soil mesomorphological analysis 139

D. E. WALLING & T. A. QUINE. The use of ^{137}Cs measurements to investigate soil erosion on arable fields in the UK: potential applications and limitations 147

Number 2

F. Bartoli, R. Philippy, M. Doirisse, S. Niquet & M. Dubuit. Structure and self-similarity in silty and sandy soils: the fractal approach 167

I. M. Young & J. W. Crawford. The fractal structure of soil aggregates: its measurement and interpretation 187

L. M. Edwards. The effect of alternate freezing and thawing on aggregate stability and aggregate size distribution of some Prince Edward Island soils 193

I. M. Young & C. E. Mullins. Factors affecting the strength of undisturbed cores from soils with low structural stability 205

A. R. Dexter & K. Y. Chan. Soil mechanical properties as influenced by exchangeable cations 219

J. M. Kirby. The influence of soil deformations on the permeability to air 227

P. J. Commins, A. B. McBratney & A. J. Koppi. Development of a technique for the measurement of root geometry in the soil using resin-impregnated blocks and image analysis 237

K. S. Grewal, G. D. Buchan & R. R. Sherlock. A comparison of three methods of organic carbon determination in some New Zealand soils 251

P. M. Reid, A. E. Wilkinson, E. Tipping & M. N. Jones. Aggregation of humic substances in aqueous media as determined by light-scattering methods 259

K. Raulund-Rasmussen. Aluminium contamination of acid soil solution isolated by means of porcelain suction cups: a reply to a paper by Hughes & Reynolds (1990) and an interpretation of aluminium release 271

N. J. Barrow. Testing a mechanistic model. XI. The effects of time and of level of application on isotopically exchangeable phosphate 277

A. P. Whitmore. A method for assessing the goodness of computer simulation of soil processes 289

R. Webster. Local disjunctive kriging of soil properties with change of support 301

Book Reviews 319

List of Referees in 1990 333

Number 3

E. A. Davidson, S. C. Hart, C. A. Shanks & M. K. Firestone. Measuring gross nitrogen mineralization, immobilization, and nitirification by ^{15}N isotopic pool dilution in intact soil cores 335

J. R. M. Arah, K. A. Smith, I. J. Crichton & H. S. Li. Nitrous oxide production and denitrification in Scottish arable soils 351

E. Witter. Use of $CaCl_2$ to decrease ammonia volatilization after application of fresh and anaerobic chicken slurry to soil 369

J. D. Kwari & T. Batey. Effect of heating on phosphate sorption and availability in some north-east Nigerian soils 381

J. S. Robinson & J. K. Syers. Effects of solution calcium concentration and calcium sink size on the dissolution of Gafsa phosphate rock in soils 389

A. Bar-Tal, B. Bar-Yosef & Y. Chen. Validation of a model of the transport of zinc to an artificial root 399

P. R. Darrah. Measuring the diffusion coefficient of rhizosphere exudates in soil. I. The diffusion of non-sorbing compounds 413

P. R. Darrah. Measuring the diffusion coefficient of rhizosphere exudates in soil. II. The diffusion of sorbing compounds 421

E. Tipping & C. Woof. The distribution of humic substances between the solid and aqueous phases of acid organic soils; a description based on humic heterogeneity and charge-dependent sorption equilibria 437

G. J. Churchman, C. M. Burke & R. L. Parfitt. Comparison of various methods for the determination of specific surfaces of subsoils 449

G. J. Churchman & C. M. Burke. Properties of subsoils in relation to various measures of surface area and water content 463

C. A. Glasbey, G. W. Horgan & J. F. Darbyshire. Image analysis and three-dimensional modelling of pores in soil aggregates 479

J. M. Kirby. Critical-state soil mechanics parameters and their variation for Vertisols in eastern Australia 487

R. J. Schaetzl. Factors affecting the formation of dark, thick epipedons beneath forest vegetation, Michigan, USA 501

A. B. McBratney, G. A. Hart & D. McGarry. The use of region partitioning to improve the representation of geostatistically mapped soil attributes 513

Erratum 533

Number 4

E. Barberis, F. Ajmone Marsan, V. Boero & E. Arduino. Aggregation of soil particles by iron oxides in various size fractions of soil B horizons 535

A. Okunlola & D. Payne. Use of force–deformation curves to estimate Young's modulus and its applications to soil aggregate breakdown 543

L. Di Pietro & F. Lafolie. Water flow characterization and test of a kinematic-wave model for macropore flow in a highly contrasted and irregular double-porosity medium 551

D. R. Scotter, L. K. Heng & R. E. White. Two models for the leaching of a non-reactive solute to a mole drain 565

W. H. Hendershot & F. Courchesne. Comparison of soil solution chemistry in zero tension and ceramic-cup tension lysimeters 577

N. W. Menzies, L. C. Bell & D. G. Edwards. Characteristics of membrane filters in relation to aluminium studies in soil solutions and natural waters 585

M. K. Conyers, D. N. Munns, K. R. Helyar & G. J. Poile. The use of cation activity ratios to estimate the intensity of soil acidity 599

M. E. Guadalix & M. T. Pardo. Sulphate sorption by variable charge soils 607

P. A. Wookey & P. Ineson. Chemical changes in decomposing forest litter in response to atmospheric sulphur dioxide 615

P. Jambu, A. Amblès, H. Dinel & B. Secouet. Incorporation of natural hydrocarbons from plant residues into a hydromorphic humic podzol following afforestation and fertilization 629

S. Christensen & B. T. Christensen. Organic matter available for denitrification in different soil fractions: effect of freeze/thaw cycles and straw disposal 637

R. Poss, J. C. Fardeau, H. Saragoni & P. Quantin. Potassium release and fixation in Ferralsols (Oxisols) from Southern Togo 649

Z. L. He, K. N. Yuan, Z. X. Zhu & Q. Z. Zhang. Assessing the fixation and availability of sorbed phosphate in soil using an isotopic exchange method 661
